

Bodegas Langa Chardonnay

CALATAYUD (SPAIN)

The Los Yermos vineyard can be found between the mountain range La Sierra de Armantes and the River Ribota, near the town of Torralba de Ribota. This farming land is located at an average altitude of 600 meters, the vineyard's particular climate, or mesoclimate, is characterized by a low yearly rainfall of around 250 liters per square meter. The stony material and clay originating from La Sierra de Armantes, means that the soil on which these vines are grown is ideal and has been used for vine growing for many centuries.

Website: www.bodegas-langa.com

Grapes: Chardonnay - 100% Organic, Biodynamic

Viniculture: 6 months in bottle

Alcohol: 13% vol.

Tasting Notes

Appearance: Straw color with green tints

Nose: Complex and intense aroma varied with apple, peach, fennel, honey and exotic fruits (guava, passion fruit).

Palate: Ample palate, fat, on first taste clean and fresh thanks to its sharp acidity.

Suggested Pairings: Perfect accompaniment to pastas, fatty fish and white meats.

Calatayud Wine Region of Spain

Climate: Continental climates are hot dry summers and cold winters with a good probability of frost during six months of the year.

Calatayud (DO) is located in the southwestern corner of the province of Zaragoza (Aragón, Spain). It is southwest of the Rioja and Navarra DO in the North Central region of Spain. It is in the valley of the River Ebro, crisscrossed by many other rivers. The vineyards are south facing slopes of the Sierra de la Virgen range. Calatayud achieved DO status in 1990 and it became Aragon's second largest quality wine-producing region after Cariñena. Soils are stony, loose, very poor in nutrients and with a high lime content.

Red varieties are 83% of the vines planted. Seven red varieties authorized are Garnacha (55% of the vineyards planted), Mazuelo, Tempranillo, Monastrell, Cabernet Sauvignon, Merlot and Syrah. The authorized white varieties are white Macabeo, Malvasía, Garnacha Blanca and Chardonnay.

Grenache, Garnatxa or Garnacha is one of the most widely planted red wine grape varieties in the world. It ripens late, so it needs hot, dry conditions such as those found in Spain, where the grape most likely originated. It is also grown in Sardinia, the south of France, Australia, and California's San Joaquin Valley.
